

PAPERplus® Papillon and AIRplus® Bubble
Wholesaler for pharmaceutical products

SIMPLER, FASTER AND MORE EFFICIENT

PRODUCTS: pharmaceutical supplies
SCOPE: one PAPERplus® Papillon,
one AIRplus® Mini with AIRplus® Bubble
film including a Coiler
TOTAL OUTPUT: 2.500 packages a week

CHALLENGE - RAPID GROWTH OVER A SHORT PERIOD OF TIME

As the medical supplies business of a UK wholesaler had grown rapidly over a short period of time, and a significant increase in shipping items per day – with over 2.500 parcels sent out per week, the loose fill solution that was previously utilized had to be reconsidered. Simpler, faster and more efficient packaging processes as well as a more sustainable packaging solution had to be found.

The customer chose Storopack for its consultation process and customized packaging solutions. Storopack helped to review, design and install the new effective system. The new solution was installed at the location within three hours and was ready for use.

“The Storopack team were highly focused on achieving our objectives throughout the consultation process and delivery of the entire project.”

SOLUTION - PAPERplus® PAPILLON MOUNTED ONTO A TABLE AND PRE-COILED AIRplus® BUBBLE FILM

The challenge of having accessibility to all packaging products for the packers was solved with a PAPERplus® Papillon machine which is mounted on a table in the packing area. Accessible from two packaging tables the machine feeds two packers simultaneously. In addition, a remotely located AIRplus® Mini machine produces AIRplus® Bubble film which is coiled and then placed beneath the bench for easy access.

Consumables used are PAPERplus® Papillon Paper made from 100% recycled material and AIRplus® Bubble Recycle film. AIRplus® Recycle is ideal for companies that value sustainability: the film type consists of polyethylene and at least 50 percent recycled material.

“We achieved an effective packaging process review which has delivered efficiencies, increased throughput, whilst enabling us to use PAPERplus® Papillon 100% recycled material and AIRplus® Recycle, and we are extremely satisfied with the result.”
